Dr. K. V. Venkatesh
Professor

Recommendation letter for Mr. Sireesh Limbu

I have known Mr. Sireesh Limbu for about three years in my capacity as his course instructor at Indian Institute of Technology (Bombay).

Sireesh has fared well in his undergraduate program, which is evident from his confidence in applying basic principles to research. I have taught him two courses, Mass Transfer Operations and Biochemical Engineering, in which he has fared well. His overall grades do not reflect his analytical and problem solving capabilities. His mathematical and computer skills are very good. He has an ability to independently think on a research project. His communication skills, both verbal and written, are good. I am certain that he will make an excellent researcher and also work towards growth in his career.

Overall, I would rank him in the top 10% of the graduate students, I have known at IIT Bombay. I can assure you that Sireesh is highly motivated and would rate his potentialities for academic pursuit as very high. I will not hesitate to offer him admission with scholarship into our department. I strongly recommend Sireesh for admission into your department with scholarship. I wish him all success for his future endeavors.

K. V. Venkatesh, Ph.D (Purdue University),
Field of Specialization: Systems Biology and Biosystems Engineering
Professor, Dept of Chemical Engineering, IIT Bombay
Associate Faculty, School of Biosciences and Bioengineering,
Visiting Research Professor: Dept. of Chemical Eng., University of Delaware, USA
